**Daniel Malundu – Personal Website**

**About the Website**

This is my personal website developed as part of the ICT251 Web Technologies Activity 3 assignment. It introduces me as a Computer Science student and presents my interests, learning plan, projects, skills, photo gallery, media and contact form.

**Technologies Used**

- HTML5 for the website structure
- CSS3 for styling and responsive design
- JavaScript for interactive features

**JavaScript Features**

1. Contact form validation and message preview.
2. Dark and light theme switch.
3. Interactive photo gallery with Previous and Next buttons.
4. Mobile navigation menu.

**Testing**

I tested the website locally using Visual Studio Code and Live Server. I checked the contact form, theme switch, photo gallery, mobile navigation, navigation links, project section, responsive layout and browser console.

**Sources**

- Class notes and ICT251 Activity 3 assignment instructions.
- Images and other media used on the website, as applicable.
